

Hand Lettering with Double-ended Brush Pen

Turn of your cellphone, slow down, enjoy the silence, breathe the fresh air – this could be your plan for the weekend! And after you arrived back home, you grab some paper and your brush pens, and you start creating your own phrase with beautiful brush pen lettering.

Step-by-step tutorial

Gently sketch your phrase and all decorative and embellish elements with a pencil. In this step you can easily make corrections in the overall composition.

If you hold two pen tips together for a while, the ink colour will get exchanged...

... and you can create a beautiful two-coloured gradient while writing.

Now draw decorative lines around your letters and other decorative elements such as mountains, footprints and grass.

Finally, carefully erase all visible pencil lines.
