Step-by-step tutorial

1

Print off the template for your desired design.

Shade over the back of the template with a soft pencil (e.g. Mars Lumograph 7B).

Tip: The template can be enlarged to whatever size you want at a copy shop, so you can even create A2 size posters.

2

Attach the template (front side up) to the top corner of your lettering paper using masking tape. Position the template so that the line of the T in “sweet” is directly over the line of the T beneath the rainbow. Then go over the lines with a sharp HB pencil, to transfer the design onto the paper. Before you remove the template, lift up one corner to check that you have transferred all the lines.

3

Go over the banner, clouds, hearts and letters with the lightfast 0.7 mm black pigment liner.

4

Now use the watercolour pencils to create the rainbow, working from the inside to the outside. Start with red, then orange, yellow, green and blue.

5

Next go over the colours with a paintbrush and some clear water to create a watercolour effect, and leave everything to dry completely.
