

3D Effect Aquarium

This creative challenge is also ideal for working in teams:
One person is responsible for the background, the others for the fish!

Dip the painting sponge into dark blue paint and dab the cardboard - but not so much that it is completely covered.

2

Then use white to mix a lighter shade of blue and dab all the empty areas. You can also dab another blue/green shade on top.

3

Draw a number of fish on white paper. You can use the templates. Keep the fish shapes simple so that you can cut round them easily!

4

Now colour the fishes by splashing the paint through a sieve using a toothbrush. Cut out the fishes and fix an adhesive foam dot to the back of each one.

5

Now you can let your fish swim in the sea! Position the fish wherever you want them on the blue background.

What you need

Product	Article no.	Quantity
STAEDTLER® 8880 Watercolour paint - Cardboard box containing 12 watercolour paints in assorted colours	8880 C12	1
Noris® 965 Hobby scissors - Blistercard containing scissors with 17 cm blade	965 17 NBK	1
