

## Easter eggs line art

We have a trendy Easter decoration idea for you today. We'll show you how you can paint your Easter eggs in soft pastel colours with our Watercolour pencils and then draw a great line-art motif on them with the Lumocolor Marker.

An article by Mone

## Step-by-step tutorial

1

Blow out the eggs and wash them well. Then let the eggs dry thoroughly. Now paint the eggs with the watercolour pencils in the colours of your choice.

**Please note:** Do not press down too hard with the pen or your egg will break.

2

Then use the soft brush and a little water to paint the colour on the egg in a circle. If you are satisfied with the result, let the paint dry on the egg for about 15 minutes.

3

Once the paint has dried, you can use the Lumocolor permanent Marker to draw different line art patterns on the egg. Flower motifs or faces always look great. If you are not very confident about drawing the line art motifs, draw your motifs on the egg with a pencil.

Once all the eggs have been finished, you can decorate them in a nice basket or hang them on your Easter tree.

## Material overview

## What you need

Product	Article no.	Quantity
<b>STAEDTLER® 146 10C</b> Watercolour pencil - Metal case containing 24 watercolour pencils in assorted colours	14610C M24	1
