

FIMO leather-effect - Hairslides

A casual everyday accessory.

Whether you only want to put your hair up for a little while to give yourself more freedom of movement, or you're looking for a stylish accessory for everyday use or even a special occasion, these FIMO leather-effect hair slides are the perfect choice. Held in place with a simple lead pencil or coloured pencil, they really catch the eye.

Step-by-step tutorial

1

Take a block of FIMO leather-effect in black. Roll it out with the acrylic roller to create a sheet about 0.5cm thick. Alternatively, use the clay machine on setting 2.

2

Take a block of FIMO leather-effect in watermelon. Roll it out with the acrylic roller to create a sheet about 0.5cm thick. Alternatively, use the clay machine on setting 2.

Take 5 portions of watermelon and half a portion of black. Knead the black FIMO leather-effect into the watermelon-coloured FIMO for as long as it takes to achieve a uniform, darker colour. Roll this out with the acrylic roller to create a sheet about 0.5cm thick. Alternatively, use the clay machine on setting 2.

Tip: Work in progress and left-over material should be protected against sun and heat and can be stored in a screw-top jar or in cling film to protect it from dust and dirt.

3

Now you need your clay machine. Pass each FIMO leather-effect sheet progressively through the clay machine until you reach setting 3.

Preheat the oven to 130°C / 266 °F and check the temperature with the FIMO oven thermometer, place your FIMO flat on some baking paper on the baking sheet and leave to harden for **30 minutes in the oven at 130°C / 266 °F on upper and lower heat.**

Tip: The leather effect stands out even better if you move the FIMO sheet gently by hand after rolling it out, pulling it apart a bit.

4

Leave the sheet to cool briefly after hardening and then you can continue working with the FIMO leather-effect. Take a scalpel or a sharp knife and cut out the shapes of the hair slides using the templates.

Use the FIMO professional drill to make little holes and then enlarge them with a pair of pointed scissors.

5

Finally, all you have to do is push your pencil or coloured pencil through the FIMO hair slide **and your home made hair slide is done.**

Tutorial videos for the 3 variants

Material overview

What you need

Product	Article no.	Quantity
FIMO® leather-effect 8010 Oven-hardening modelling clay - Single product watermelon	8010-249	2
FIMO® leather-effect 8010 Oven-hardening modelling clay - Single product black	8010-909	2
