

Making Toilet Paper Tube Owls

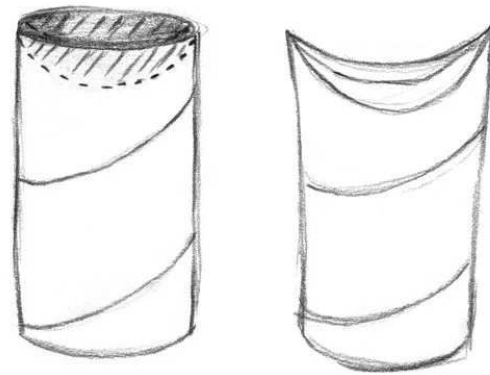

These decorative owls can be made in no time! All you need are your [fibre-tip pens](#), three or four toilet rolls and a [pencil](#) for sketching.

If you want to have owls of different sizes, simply cut one of the toilet paper tubes in half.

2

To create the classic owl shape, you have to fold the front and the back of one end of the toilet paper tube until they meet in the middle.

3

Sketch - go over - colour in!

As always, the best way to ensure a good end result is to first sketch an outline with a pencil, then go over it with a black felt-tip pen. Think about different owl faces, belly patterns and wings!

Create the outline with a black felt-tip pen and then colour your owl in! **Done!**
