

Line Art for Kids

With the help of Line Art children learn to develop a first feeling for shapes and accuracy and also have fun!

Take a Noris junior wax crayon in black and a blank sheet of paper. Draw a line across the entire sheet. The line should intertwine and turn over and over again, so that many different fields are created, as in a mosaic.

2

Now take a variety of Noris junior wax crayons in different colors and color the fields. Make sure not to color over the edge!

What you need

Additionally required:

Sheet of paper
