

## Flower garland for the children's room

**Make your own flower garland and add a dash of colour to your children's room!**

The Noris junior coloured pencil is not only perfect for small children's hands and comes in a variety of brilliant colours, but they can even be applied with water. So there is no limit to creative flower design.

## Step-by-step tutorial

1

Print and cut out the flower template.

Paint the templates with Noris junior coloured pencil. One flower consists of 3 blossoms on top of each other in different sizes. If you want more variety, you can also paint the flowers in different colours, patterns or with colour gradients.

2

Now the flowers have a watercolour effect. To do so, wipe over your painted blossoms with a damp brush.

3

When everything is nice and dry, use a pencil to roll the tips of the flowers a little to let them protrude a little from the flower underneath.

4

Now always stick 3 petals together in the middle. Apply the glue only in the middle to allow the flower tips to float freely.

5

Make several flowers from different colours and shapes this way.

6

Now attach the flowers to a string with small wooden washing pegs and decorate them.

## Material overview

## What you need

Additionally required:

Pritt glue stick, White paper (80g), Flower template, Water cups, Small clothes pegs, Cord
